

Interior LED Light

Mounted type & Pendant type

PRECAUTIONS FOR SAFETY

For a safe living environment, please be aware of the enclosed instruction manual and keep the important contents as separate records.

If you don't comply with the following quality indicators and warnings when you install the product, it may cause safety accidents and it cannot be repaired free of charge even during the free repair period.

PRECAUTIONS FOR INSTALLATION

- When installing a product, a safe installation method suitable for weight should be selected to prevent electric shock or fire caused by falling or moving out of the product.
- Incorrect connection (poor connection), connection power wires to the product, can cause heat, fire, or electric shock.
- Please follow the instructions of the electrician for repair and installation.
- This product is for indoor use only and shall be installed in a place without moisture to prevent corrosion and safety accidents and the appropriate temperature of use is -20°C to 40°C.
- Make sure to check the operating voltage (AC100-240, 50Hz-60Hz) before installing.
- Grounding is required during installation work, and incomplete grounding may cause electric shock and shortening of product life.
- Any modification of the product or arbitrary modification of the components can cause the product to fall or fire, etc.
- Wrapping with something like insulation materials may cause fire.
- Check electrical wiring for short circuits and LED Module's phase(+/-) before installing.
- Check for short circuits in case it rains.
- Ensure that operating voltage is supplied stably before installing.
- Be sure to install it on the flat ceiling.

PRECAUTIONS FOR USE

- Cutting power wires during use of the product may cause fire.
- Modification of the product, arbitrary alteration of components, disassembly, etc. may cause product failure, fire, etc.
- For safety purposes, check the fixation status frequently.
- Operation of the power switch in the vicinity of flammable substance or combustible gases can cause a fire.

PRODUCT FEATURES

- Improve produce stability by localizing all components in module units.
- Easy to install for easy construction and cost savings.
- Excellent product design helps with a pleasant environment.
- Reduce maintenance costs with long life (Over 30,000Hr)
- High light efficiency provides energy savings.

QUALITY ASSURANCE

- Product exchange or refund within 1 month of purchase when do not used.
- Free service is only available if the product have problems within the warranty period of the purchase.

INSTALLATION METHOD

Please completely turn of the power before installing the product.

(Make sure to disconnect the power from the switchboard.)

Please refer to the enclosed installation guide for installation of the product.
