The LumeGen Hexagon Garage Light system is a sleek and modern lighting system for large open spaces such as garages, game rooms, or conference rooms. The sleek light bars connect to form hexagon shapes which provide bright, even lighting across the room. Available in a small, 5-hex design or a larger 14-hex design. These lights can be flush mounted to the ceiling or suspended from the ceiling using the suspension wires (LEDHDWR10000055000 sold separately).

Product Features

- **Color Temperature:** 5000K
