The Solar Flagtop Pole Light converts sunlight into energy to power this light at night without the need for electrical wiring! Ensure total illumination in 360-degrees around the flagpole with a circular array of down-facing LEDs so whichever way the winds blowing, your flag will be illuminated! This LED light charges during the day allowing the light up to 12 hours of runtime at night with a max output of 200 lumens. Installation at the top of your flagpole and sites beneath the ball topper. This light is also great for other general lighting uses such as using it as a tent light for camping, patio light under a pergola or over the pool!

### Product Features & Specifications

- **Color Temperature:** 6500K
- **Solar Panel:** Mono-crystalline silicone
- **Solar Panel Power:** 1.8Wp
- **Brightness:** 200 Lumens
- **Housing Construction:** ABS
- **IP Rating:** IP65 wet rated
- **LEDs:** 26 pcs
- **LED Life Hours:** 100,000 hours
- **Battery:** (3x) NiMH Rechargeable AA 1.2V/1500mAh (replaceable)
- **Charging Time:** 6-8 hours
- **Run Time:** 10-12 Hours
- **Color Rendering Index (CRI):** >70
- **Discharging Temperature:** -4°F ~ 122°F (-20°C ~ 50°C)
- **Sensors:** Photocell sensor
- **Warranty:** 1 year for fixture

**It is important to install this light in an area where it gets enough sunshine to charge properly!**

### Dimensions

### Mounting

Flag pole top (1/2" Diameter opening)

Hanging Mount
